PROFESSIONAL SUMMARY

Results-driven Software Engineer with experience in full-stack web (MERN, Angular), mobile (Flutter), embedded systems, and cybersecurity. Delivered QR access systems, AI chatbots, and booking platforms. CTF competitor — captured all flags at RSA-partnered university event. Certified ethical hacker with penetration-testing experience. Skilled in Python, Java, JavaScript, React, Angular, Flutter, REST APIs, and Azure. Passionate about continuous learning and quickly adapting to new technologies, frameworks, and challenges — comfortable stepping into unfamiliar domains and delivering results.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, Flutter/Dart, C, SQL, HTML5, CSS3, VHDL

Frameworks: React.js, Angular, Node.js, Express.js, Next.js, Flutter

Cloud & Tools: Git, GitHub, Docker, Azure, CI/CD, MongoDB, MySQL, REST APIs, Postman, Figma

Security: Kali Linux, Wireshark, Metasploit, Nmap, Netcat, OSINT, Penetration Testing, CTF

CS & Methods: Agile/Scrum, OOP, System Design, Data Structures, LLM integration

WORK EXPERIENCE

Full-Stack Developer Intern — IOCode, Cairo *Jun 2026*

- Architected and maintained a REST API (AdonisJS 5, TypeScript, Prisma/MongoDB) for vStore, a multi-tenant e-commerce SaaS platform, supporting JWT auth, tenant-scoped data isolation, and role-based permissions.
- Built the full-stack client experience — a React 18 storefront, an Angular 13 admin dashboard, and a Flutter mobile app (iOS/Android) — each with tenant-specific branding, theming, and product/order flows.
- Diagnosed and fixed critical cross-tenant data-isolation bugs to ensure tenant data privacy at scale, and managed CI/CD via GitHub Actions to a production Ubuntu server (nginx + PM2).

Ethical Hacker Intern — Pathline Academy, Cairo *Jan – Feb 2026*

- Performed network traffic analysis with Wireshark, identifying 15+ vulnerability indicators across simulated enterprise environments.
- Completed 20+ TryHackMe rooms covering privilege escalation, web exploitation, and network pivoting using Kali Linux.

Mobile & Full-Stack Developer Intern — CodeMental, Cairo *Jun – Aug 2024*

- Designed and deployed a Flutter QR badge system for 200+ residents, cutting gate-access processing time by ~70%.
- Built a React.js frontend consuming REST APIs from a Node.js server, and an Angular-based admin panel for compound management.
- Developed a QR guest-pass generator enabling secure one-time visitor access and eliminating paper-based entry logs.

Software Developer Intern — EduPay, Cairo *Jun – Aug 2023*

- Engineered an installment-calculation module in Flutter, reducing billing errors and cutting calculation time by ~60%.

PROJECTS

Dockestra — Microservices Food-Delivery Platform (Talabat-Style)

Java · Spring Boot · Spring Security (JWT) · PostgreSQL · RabbitMQ · Redis · Docker · Kubernetes

Talabat-style microservices platform (user, restaurant, order, delivery, checkout services) with per-service database isolation, event-driven order sagas via RabbitMQ, JWT auth, Redis caching, and Kubernetes deployment with Prometheus/Grafana observability.

Intelligent Chatbot — LLM + Knowledge Graph

Python · LangChain · Neo4j · OpenAI API · Semantic Embeddings

Hybrid chatbot merging graph queries with LLM outputs, improving response accuracy ~40% over baseline RAG.

Wander-Mate — Full-Stack Travel Platform

MongoDB · Express.js · React.js · Node.js · Stripe API · REST APIs

Full-stack booking platform for flights, hotels & tours — Stripe payments, itinerary builder, role-based auth.

EDUCATION

B.Sc. Computer Engineering — German University in Cairo (GUC) *Sep 2021 – Present*

Thesis at University of Stuttgart (Mar–Aug 2025): query concepts for asset administration shells. Coursework: Machine Learning, HCI, Cybersecurity, Advanced Data Structures, Networks, Embedded Systems.

ACHIEVEMENTS & CERTIFICATIONS

CTF Competition — RSA Partnership (2026): Captured all flags at university-wide Capture The Flag event conducted in collaboration with RSA Security. · CEH — MaharaTech (2025–26) · Ethical Hacking — Udemy (2025–26) · Machine Learning (GUC, 2025) · Flutter Dev — Udemy (2023)
