Peter Saad — Software Developer

Cairo, Egypt
+20 122 279 1843 • peterragy0902@gmail.com • LinkedIn — GitHub

Profile

Hardworking and motivated Software Developer with hands-on experience in full-stack web development, mobile applications, embedded systems, and machine learning. Skilled in modern programming languages and tools, with a strong foundation in problem-solving, system design, and data-driven solutions. Experienced in developing intelligent systems, including chatbot applications, and eager to apply technical expertise and creativity to real-world projects while continuously learning and growing in the field of software engineering.

Education

Nefertari International School **Egypt**
IGCSE *09/2007 – 07/2021*
Graduated with high honor. Achieved A* in 7 subjects (Math, Physics, Chemistry, ICT, Computer Science, Accounting, French). Achieved A in English as a Second Language. Achieved B* in Math AS level and CS AS level.

German University in Cairo (GUC)
B.Sc. in Computer Engineering *09/2021 – Present*

University of Stuttgart **Germany**
Bachelor Thesis Research *03/2025 – 08/2025*
Thesis Title: *"Design of a query concept for asset administration shells allowing extensions for integrated and referenced file types"*

Internships

EduPay **Egypt**
Software Developer Intern *06/2023 – 08/2023*
- Developed a function for calculating installments.
- Completed a Flutter course on Udemy to support backend and frontend development.

CodeMental **Egypt**
Mobile App Developer Intern *06/2024 – 08/2024*
- Integrated a QR code ID badge system for Lake View Residence compound.
- Developed a QR code generator for guest passes.
- Streamlined QR code-based access for both owners and visitors.

Projects

Wander-Mate: Full-stack travel website (MERN). Booking flights, hotels, tours, souvenirs, custom itineraries, secure payments, and user-friendly interfaces.

Embedded Keyless Car Entry: RFID-based card entry with DC motor. Automated locking after entry for enhanced security.

Smart Car (VHDL): Microprocessor-coded system for lane-keeping, obstacle detection, and error messages displayed on LCD.

Network Development: Designed and simulated computer networks using Cisco Packet Tracer. Focused on routing, switching, subnetting, and network troubleshooting.

Intelligent Chatbot System: Developed a chatbot by integrating a knowledge graph with large language models (LLMs). Combined semantic embedding retrieval and knowledge graph query results, then leveraged LLMs to merge and refine outputs, enhancing response accuracy, context awareness, and user relevance.

Technical Skills

Languages: Java, Python, Flutter, C, HTML, CSS, JavaScript, SQL, React, VHDL, Arduino

Tools: Eclipse, VSCode, Android Studio, Cisco Packet Tracer, Azure Data Studio, Xcode, Postman, Figma, git , Kaggle

Operating system: Kali Linux, MacOS

Courses

Ethical Hacking: Udemy (2025–Present). Focus on networks, penetration testing, and Kali Linux tools.

CEH: MaharaTech (2025 - Present). Hacking skills and methodology needed to perform a penetration test against an organization.

Flutter Development: Udemy (06/2023–08/2023). Enhanced mobile app development skills.

Machine Learning: Elective Course (09/2025-12/2025).Completed a Machine Learning elective covering supervised and unsupervised learning, model training and evaluation, and practical implementation using real datasets.

Human Computer Interaction: Elective Course (09/2025-12/2025). Studied Human Computer Interaction with emphasis on user research, wireframing, prototyping, and usability testing.

Soft Skills

Teamwork — Problem Solving — Creativity

Languages

English: Full Professional Proficiency

French: Basic Proficiency

German: Basic Proficiency

Arabic: Full Professional Proficiency
